

Are you using your best Business Resource?

By Bridget Engel

Often in times of stress, fear kicks in and our mind goes into overdrive. We imagine the worst scenario's and then start attracting them to us. When this happens, our energy contracts which constricts our pipeline to universal energy, and we can completely forget there is such a thing as Divine Guidance. Life starts feeling really hard and we find ourselves in reaction mode rather than response mode. It's like our light switch has been set at a low dimmer. This is why it is so valuable to establish daily habits that assist us in cultivating this special relationship with Divine Guidance.

A few days ago I was leaving an appointment and Divine Guidance gave me a message to call my mother. You know it's Divine Guidance when the message is usually short and to the point. My mind kicked in and I thought I would save a cell phone bill and call her from my landline. Again, Divine Guidance came through and said to call her now. I am so pleased I did because my mother had a minor accident that resulted in a cut that bleed for over 3 hours, and she was feeling distressed. In that moment I asked Archangel Raphael, the angel of healing, to assist my mother - and the bleeding stopped by the time we hung up the phone.

When we are connected to our Divine Guidance we can connect to any aspect of the universe. There are so many choices available to us and we can call upon guides, angels, our higher self, ascended masters, etc. to assist us. I love working with the Angels and because of my deep affinity for the Angels, I attract a lot of them into my life and receive wonderful results.

For real success in business, you are going to need some of the deep insights and wisdom that come from a spiritual life and being connected to your Divine Guidance. The most successful people on the planet are tapped into Divine Guidance and their Inner Business Magician and the dividends are huge. You can plan on experiencing more profits, ease, ideas handed to you on a silver platter and higher levels of peace and joy.

**4 Keys to Unleashing Your Inner Business Expert
be there and flip the flow switch to ON!**
